

Earthquake

During An Earthquake/Aftershock

Inside a facility:

- Plan your best safe zone.
- Drop Cover Hold.
- Do not try to move while the ground is shaking.
- When shaking has stopped, and/or fire alarm has activated, evacuate building immediately.
- Make your way to the nearest holding area or Ilam Fields if safe to do so.
- Await instructions from Security or Emergency Personnel.
- Do not re-enter buildings/facilities until the all clear has been given by Security or Emergency Services personnel.

If outside:

- Stay outside.
- Do not re-enter buildings/facilities.
- Take shelter clear of buildings, trees, power lines or other potential hazards.
- When shaking has stopped go to your nearest holding area or Ilam Fields if safe to do so.
- Await instructions from Security or Emergency Personnel.

DO NOT pass back through campus to get to Ilam Fields – use external roads.

DO NOT isolate yourself – stay with others.

REPORT any hazards (fire, hazardous material spill or major structural damage) to UC Security.

REPORT & TREAT injuries if able and/or safe to do so.

LOOK FOR Emergency Personnel in HIGH VIZ VESTS if you require assistance.

MAKE SURE you know the Evacuation Procedures for all buildings/facilities you attend.

YOU WILL FIND Emergency Procedure Boards in all University Facilities.

IF YOU HAVE TO LEAVE the University, advise a colleague, supervisor or fellow student. Remember that traffic may be congested.

DO NOT HESITATE TO EVACUATE – EXPECT AFTER SHOCKS

Note: If a full evacuation has been declared, it may not be possible to return to your building immediately. Plan to keep your keys and wallet on your person at all times.
